How can I change the frame rate of the animated texture?

Open the prefab (A) and select the “panel” object (B), then in the inspector tab find the animation script in order to change the frame rate (C) (between 15-18 frames per second is fine).

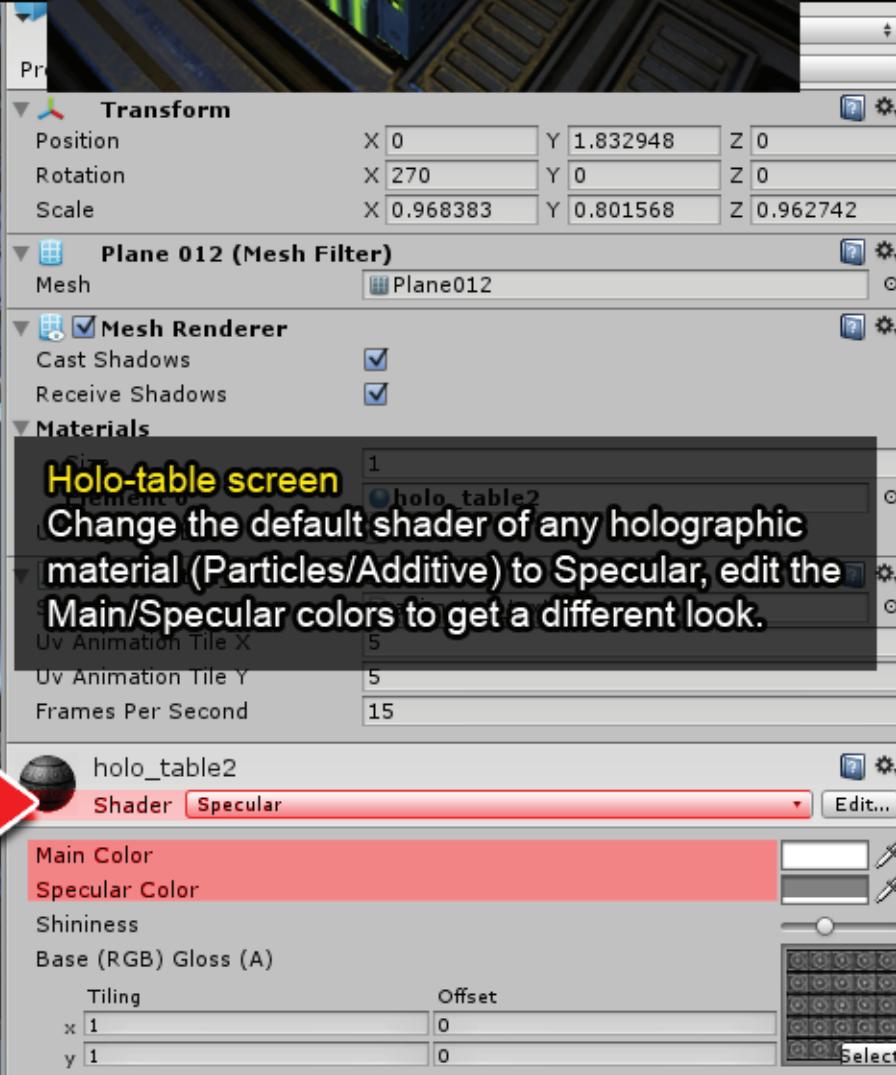

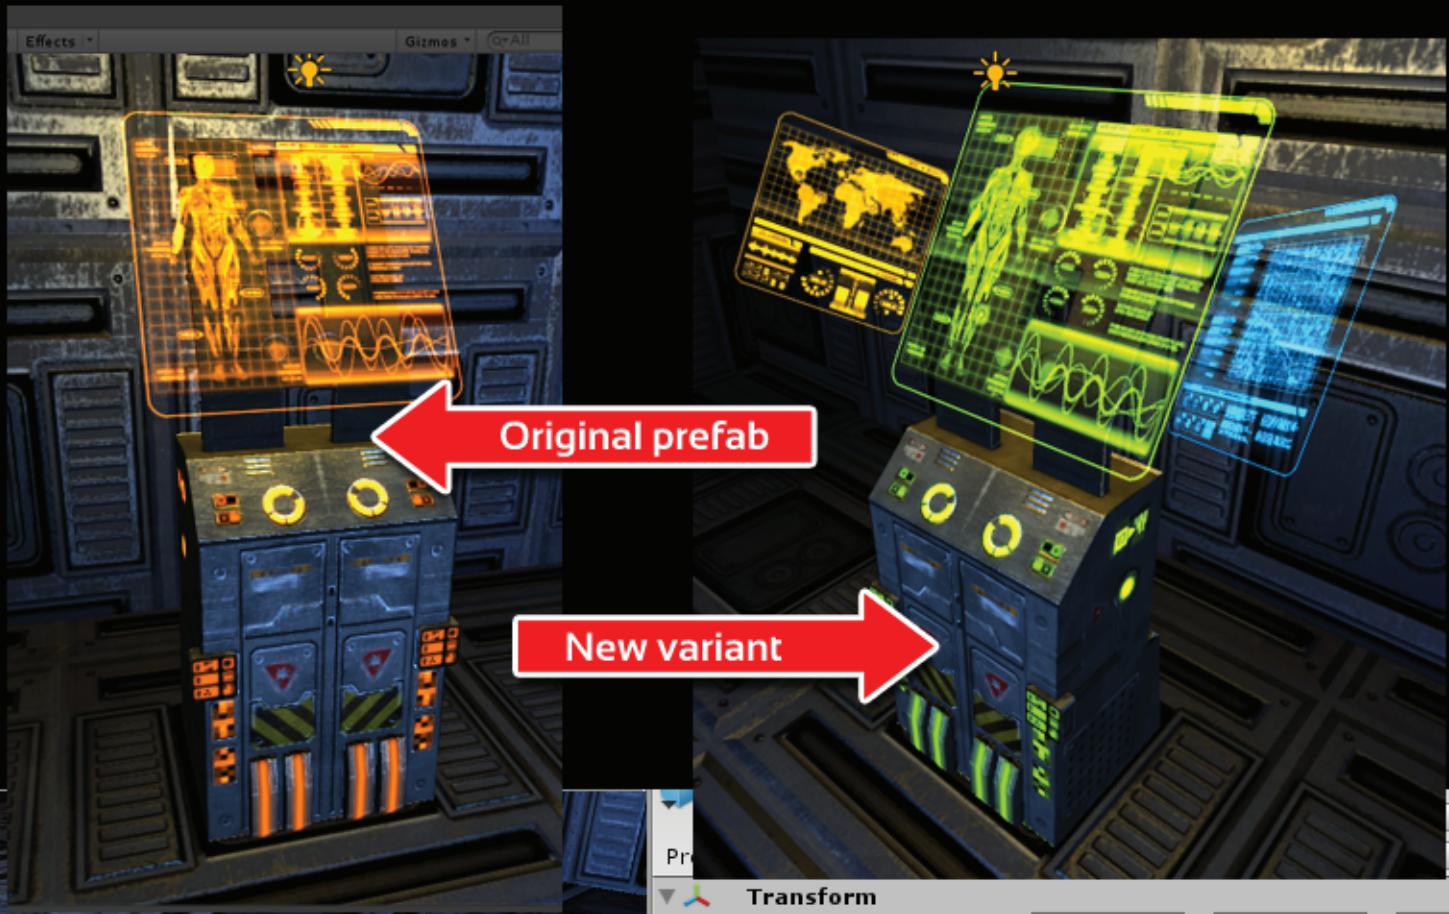

How can I change the color of the holographic display?

Select the object with the animated texture applied (A), then in Inspector panel (B) find the tint color of the material and define a new color (C).

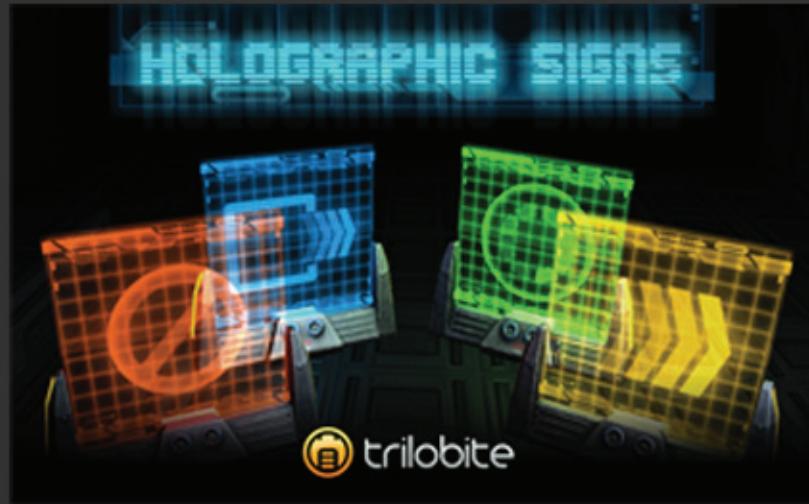

Hints:

- Attach new planes to achieve different shapes.
- Modify the original colors to match your scene.

Create a control room in a few minutes

Holographic panels HD are compatible with Holographic signs,
available on the Asset Store
